

## **RTGS Multicurrency in a snapshot**

The Egyptian real time gross settlement system facilitates settlement of payments in both domestic & foreign currencies, this satisfies a list of advantages, among which are the following:

- Provision of real time position monitoring for participant banks balances in foreign currencies;
- Provision of Liquidity optimization mechanism and thus, making the best use of liquidity in foreign currencies.
- Preserving Finality of settlement;
- Provision of effective, efficient and reliable real-time Financial Market Infrastructures in domestic and foreign currencies;
- Facilitation of country-wide economic activity;
- Facilitation of smooth operation of modern market economy strategies, and;
- Integration of RTGS system with other CBE related FMIs; hence with CAS, CSD & CMS.
